

Standard Features

■ Motor

60Hz high starting torque, continuous-duty, single-phase capacitor start or 3-phase motor, open drip proof, protected against overload. Also available with 50Hz 220V 1-phase and 380V 3-phase motor, consult inside sales.

■ Reduction

First step in reduction 5L/B V-belt drive, additional steps by chain and sprockets. Input shaft is 5/8", supported by precision ball bearings. Output shaft is 1" with 1/4" keyway, supported by ball bearings. Output shaft speed: 41 rpm.

■ Clutch

Friction type, positioned on input shaft, easily adjustable from outside.

■ Drive

#50 roller chain with a 50B12 sprocket for the operator drive shaft. Door sprocket selected for a door travel of 6"/s to 12"/s.

■ Brake

Mechanical brake.

■ Manual Operation

Hoist-a-matic® self-engaging hoist (floor level engagement device is not required to operate) for manual chain operation.⁽²⁾ Manual egress release (not shown). An electrical interlock automatically disconnects power to the motor operator when chain hoist or egress are engaged. Hoist on right is standard.

■ Electrical Enclosure

All electrical components are in a Nema 1 enclosure. Hinged electrical enclosure cover with stable opened position.

■ Limit System

Rotary-type oil-impregnated steel cams, commercial grade switches. Limit shaft is supported by self-lubricating bronze bushings for increased precision. Remains in time when there is a manual operation or after the motor has been removed.

■ Accu-cam® Feature

Precise and quick one-handed adjustment of the limits.

■ Corrosion Protection

Frame and control enclosure protected by baked on, long lasting enamel finish. Polymer control box cover. All shafts protected by yellow chromate coating.

■ Mounting

Wall, hood, or shelf mounted on the right or on the left of the door. For indoor use only.

■ Shipping Weight

Approx. 101 lb - 46 kg.

■ Warranty

2 Years.

⁽¹⁾ For properly balanced rolling steel doors with less than 80 lb of imbalance, rolling sheet doors, vinyl doors or equivalents. For larger rolling doors, we recommend using an electrically activated drum-band type solenoid brake, see Mechanical Modifications.

⁽²⁾ The hoist is designed for light and limited use in the event of troubleshooting only.

Opera-HJ

Jackshaft Operator
Heavy-Duty Hoist and Manual Egress

Hoist-a-matic®

Self-engaging chain hoist with automatic cut-off

Floor Level Disconnect

Disconnect mechanism for manual egress (not shown)

Accu-cam® Limit Feature

For precise and quick one-hand limit setting adjustments

Hinged Cover with Stable Opened Position

For easy access to components and wiring

The Opera-HJ is a heavy-duty industrial operator featuring both the patented Hoist-a-matic®, a self-engaging chain hoist for manual operation, as well as a floor level disconnect.

The operator is specifically designed for store-front grilles⁽¹⁾ when a manual egress is required. It can be wall, hood, or shelf mounted on either side of the door.

The operator is offered with the Electronic Control Board (BOARD 070) and monitored external entrapment protection devices (ANSI/CAN/UL 325 compliant).

Control Options

■ ECB Units (BOARD 070)

24Vdc relaying circuit with a 40VA class II transformer, non-volatile memory. Features available: On-board radio receiver, 1.5s delay on reverse, programmable maximum run timer, mid-stop, timer to close (suspension possible from floor level), built-in cycle-counter, independent input loop terminal, advance close system, test buttons, reverse wiring detection and door lock sensor. Operating mode selectable on site: C2, B2, D1, E2, T or TS.

■ "M" Version

Provides the monitoring of Primary External Entrapment Protection Devices. Includes monitored photoelectric cells (PHOTO 070 standard). In this mode, Ancillary Entrapment Protection Devices (optional) may be used to supplement primary entrapment protection, such as non-monitored photoelectric cells, 2-wire non-monitored sensing edges and pneumatic sensing edges. Certifications: ANSI/CAN/UL 325.

Note: ANSI/CAN/UL 325 apply to units intended to be used in ordinary locations in accordance with the Canadian Electrical Code, Part I and the National Electrical Code, NFPA 70, respectively.

Main Options

■ Control Accessories

Angled terminal strip allows for the connection of 3-button stations (one supplied with the operator), non-monitored sensing edges / photoelectric cells / light curtains, external radio receiver, ceiling pull switches, key switches, loop detectors, LED strips, external interlocks, universal auxiliary output module. Optional Manaras Internet Control™ (MIC) available. 2A fuse protected 24V_{ac} output is available for accessory power supply. Nema 4/12 or Nema 4X protected monitored photo cells upgrade available.

■ Environmental Modifications

Nema 4/12 and Nema 4X enclosures.

■ Mechanical Accessories

Wall or hood mounting bracket, chain spreader, etc. Consult inside sales.

■ Mechanical Modifications

Left hand chain hoist, cast iron flanged pillow block bearings on output shaft, limit shaft speed-up, etc. Consult inside sales.

Dimensions

Clearance: Side room required 15" (380 mm)

Motor Selection

Maximum Door Area in Square Feet (WxH)
